Company : SAFI Quality Software Inc

Web site : [www.safi.com](http://www.safi.com)

Telephone number : 1-800-810 9454

Product(s) offered (a maximum of 4 products) :

- 1- Structural Level 1 : Steel Calculator™
- 2- Structural Level 2 : SAFI™ Steel Design
- 3- Structural Level 3 : Virtual Steel Buildings™

Individual descriptions of each product (a maximum of 30 words per product)

**1-Structural Level 1 : Steel Calculator™**

The **Steel Calculator™** allows to verify, design and optimize steel beams and columns. It is an efficient validation tool to verify design results of specific elements of complex models.

**2-Structural Level 2 : SAFI™ Steel Design**

**SAFI™ Steel** allows to verify, design and optimise the steel members of a structure and composite steel-concrete beams. The unique interface of SAFI 3D allows to create, analyze and design complex models. Design optimisation make economic and quality steel structures a reality.

**3-Structural Level 3 : Virtual Steel Buildings™**

The **Virtual Steel Buildings™** technology stores all design information and intents in a single coherent database and enhance the model with configurable views. It integrate the design processes of as many aspects such as estimation, engineering, detailing, fabrications.
